

MOHIT PAL

AI & Machine Learning Student · B.Tech CSE · Lovely Professional University

+91-6387203487 | pal001768@gmail.com | [LinkedIn](#) | [GitHub](#) | Jaunpur, UP, India

PROFESSIONAL SUMMARY

Passionate AI & Machine Learning student with hands-on experience in end-to-end ML pipelines — data preprocessing, feature engineering, model training, evaluation, and visualization. Proficient in Python and Java with a strong DSA foundation. Seeking ML / Software Engineering internship opportunities at top technology companies.

TECHNICAL SKILLS

Languages: Python (Primary), Java

ML Algorithms: Logistic Regression, Decision Tree, Random Forest, K-Means Clustering, Naive Bayes

ML Concepts: Supervised & Unsupervised Learning, Feature Engineering, Cross-Validation, Hyperparameter Tuning, Model Evaluation, EDA, Regularization

DSA: Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Sorting, Searching, Dynamic Programming, Recursion, Backtracking, Hashing, Time & Space Complexity (Big-O)

Libraries: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn

Tools: Jupyter Notebook, Google Colab, Git, GitHub, VS Code

Web & Other: HTML5, CSS3, JavaScript · Arduino, C++

AI / ML PROJECTS

CreditWise — Loan Prediction System · Python · Scikit-learn · Pandas · NumPy [↗ GitHub](#)

- Built supervised ML pipeline using Logistic Regression, Decision Tree & Random Forest with k-fold cross-validation and GridSearchCV hyperparameter tuning.
- Performed full preprocessing — null imputation, label/one-hot encoding, StandardScaler; evaluated using accuracy, precision, recall & F1-score.

Smart Cart — Customer Segmentation · Python · K-Means · Matplotlib · Seaborn [↗ GitHub](#)

- Applied K-Means clustering for retail customer segmentation; used Elbow Method & Silhouette Score to find optimal clusters.
- Visualised high-value, low-value & at-risk customer segments to support data-driven marketing decisions.

OTHER PROJECTS

Responsive Restaurant Website · HTML5 · CSS3 · JavaScript [↗ GitHub](#)

- Mobile-first restaurant site with interactive menus, online reservation, Google Maps integration & modern UI/UX.

Automatic Street Light System · Arduino · C++ · LDR Sensor

- LDR-based auto-switching street lighting with Arduino — demonstrated IoT and embedded systems fundamentals.

EDUCATION

Lovely Professional University

Aug 2024 – May 2028

B.Tech – Computer Science & Engineering (AI/ML Focus) | Phagwara, Punjab

Jawahar Navodaya Vidyalaya

2018 – 2023

Class XII – Science (2023) · Class X (2021) | Jaunpur, UP

CERTIFICATIONS

- ▶ **Artificial Intelligence & Machine Learning** – Apna College
- ▶ **Data Visualisation** – TCS Forage Virtual Experience
- ▶ **Interview Skills & Competitive Programming** – Coding Tantra

CORE COMPETENCIES

Analytical Thinking · Problem Solving · Fast Learner · Research Mindset · Attention to Detail · Team Collaboration
